Selected
Contact provided within DIT network

Not selected
Innovator is able to follow up at later stage if required

DIT Help & Support
DIT is focused on supporting *economic growth* as it relates to healthcare technology innovation. Support to businesses and its duration is bespoke and dependent on innovator needs and business opportunity, for example:

- DIT: Tailored support for foreign-owned companies to invest and develop products for the UK market
- DIT: Tailored expertise, tools and initiatives to support UK companies to export overseas
- DIT leverages its UK and international network to provide this support
